# Holiday Gifting Guide: For Kids

Looking for low or no waste gifts for the kiddos on your list? Look no further, we've put together some great ideas for the young and young at heart.

## 01 | CHOOSE ITEMS THAT WILL GO THE DISTANCE

Clothes on the Christmas list? Look for items that will grow with them - jackets with extendable arms, hems that are made to be taken down as they grow, and timeless designs that can be passed down and loved all over again.

Toys and games don't have to be a fleeting fancy - look for options that aren't limited to a specific age group or interest. Some options to consider are art supplies that can be used in different ways or building kits that can increase in complexity as they age.

## 02 | MAKE MEMORIES, NOT CLUTTER

Experiences like trips to the zoo, seeing a favourite show live, or an activity related to a special interest like horseback riding are a great opportunity to make lasting memories.

Gifts that keep on giving, like memberships to local zoos, science centres, or activity parks are a great option for gifts that they can continue to enjoy long past the holiday season.

Help them learn something new (and maybe secure your place in their future acceptance speeches) with a gift certificate or excursion to an art class, kids cooking class, or even a circus lesson!

## 03 | WHATS OLD IS NEW

The Holidays may be an ideal opportunity to pass along a meaningful item or heirloom. When appropriate, these types of gifts can be a great way to connect and an opportunity to share stories and memories.

A book of grandma's recipes to make together, a book or toy that you loved as a child, or a meaningful item passed down from a family member are gifts that can be treasured for years to come.
